The rectangular tables come in two types, with charts or bowls covering the upper surface. Start by building the base, which is a simple box.

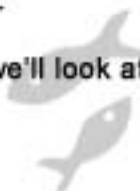

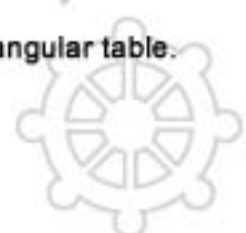

Glue the side tabs and hold until mostly dry.

Glue the four triangular tabs and fold the table top as shown. Make sure it is fairly dry, then glue the top of the base and set the table top onto it.

Next we'll look at the triangular table.

Glue the tab on the base and roll it into a cylinder.

When it's dry fold the triangular tabs over like this.

Glue the three tabs on the table top and fold the sides down onto them.

Glue the remaining tabs and press the top down onto them. Press hard and hold until dry.
